

REDEFINING **PURITY** WITH **INSPIRATION, INNOVATION & INTEGRITY**

Most trusted manufacturer of water purification systems,
parts & accessories.

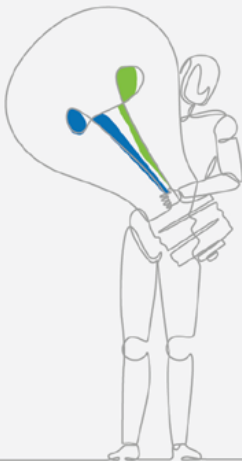

INSPIRATION

At the heart of our journey lies the inspiration we draw from our customers. Unlike others, we actively listen to their needs and aspirations, enabling us to develop solutions that truly address their challenges. In the water purification industry, this means introducing products that go beyond conventional designs to meet the specific demands of households.

INNOVATION

Innovation is the cornerstone of our success, setting us apart from others in the industry. While many focus on replicating existing solutions, we dedicate ourselves to creating products that are not only unique but also revolutionary. In the water purification industry, we introduce groundbreaking technologies and designs that haven't been seen before, reshaping the market and raising the bar for excellence.

INTEGRITY

We believe in building trust through unwavering integrity in every aspect of our business. Unlike others who may compromise on quality or transparency, we uphold strict ethical standards and deliver only the best. In the water purification industry, this means ensuring that every product is meticulously designed and manufactured to provide safe, reliable, and pure water for all.

ABOUT US

Purosis is a trusted name in the water purification industry, bringing over 30 years of collective experience in delivering innovative and high-quality solutions for clean and safe drinking water. Our deep understanding of filtration technology, combined with a commitment to excellence, allows us to develop products that set new standards in performance and reliability.

At Purosis, we recognize that access to pure water is essential for a healthier life. Our dedication to research, development, and innovation drives us to create advanced purification systems that are both sustainable and efficient.

Our diverse product range includes water purifiers, high-performance RO membranes, filter cartridges, booster pumps, and essential purification accessories. Designed for long-lasting durability and superior efficiency, our solutions cater to residential, commercial, and industrial water filtration needs.

With decades of expertise and a focus on technological advancements, Purosis continues to lead the way in water purification. Our unwavering commitment to quality ensures that every product enhances water safety, supporting a cleaner and healthier future for all.

ADVANCE PROTECTION TO ENSURE SAFETY

To ensure our products reach you in pristine condition, we've implemented a robust packaging solution featuring a dual-box system. The outer box, crafted in durable brown cardboard, provides a sturdy barrier against transportation-related damage. Inside, the vibrant, colorful inner box is meticulously protected from dust and wear, arriving at your doorstep in perfect condition. This thoughtful packaging design guarantees a delightful unboxing experience, ensuring that the product brings a smile to your face. Our commitment to quality extends beyond the product itself, reflecting in every detail of our packaging.

INLINE FILTER CARTRIDGES

purosis[™]
Redefining Purity

Advanced filtration for everyday use

Our inline filter cartridges (PS1) combine the **Activated Carbon Filter** to remove biological impurities, the **Pre Carbon Filter** to eliminate chlorine and odors, and the **Sediment Filter** to block particles. Together, they ensure clean, safe, and great-tasting drinking water.

UF MEMBRANES

Elevate the quality of water with us

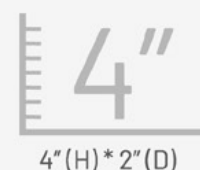

We manufacture high-quality UF membrane cartridges for effective water filtration, removing bacteria, viruses, and other impurities to ensure safe drinking water. With years of expertise, our ultrafiltration membranes enhance water quality and safety. They provide a comprehensive solution for eliminating harmful substances in water purifiers.

SINGLE RECYCLABLE
PLASTIC BAG PACKING

MASTER PACKING

4 Inch UF Membrane also comes in a single recyclable plastic bag, with 100 pieces per master packing.

POST CARBON FILTERS

Experience clean water for a healthy life

Our **Coal-Based Post-Carbon** and **Coconut-Based Post-Carbon** filters are designed to enhance water quality by effectively removing impurities, odors, and contaminants, resulting in clean-tasting and refreshing drinking water. Both filters uphold the highest standards of water purification for safe, thorough filtration.

Both types of post-carbon filters can be customized with either push-fit or threaded connections as per your requirement.

SEDIMENT FILTERS

Advanced filtration for everyday use

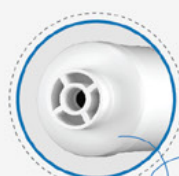

Specially designed to fit compact water purifiers where space is limited.

This filter effectively removes dirt, sand, silt, and rust, preventing clogging in RO membranes and carbon filters while enhancing the purifier's overall performance and lifespan. Its space-saving design ensures smooth water flow, better clarity, and protection against plumbing blockages, making it an ideal choice for small-sized water purifiers without compromising on filtration efficiency.

BOOSTER PUMP

Stronger flow for cleaner water

The **PuroAqua Booster Pump** boosts water pressure, optimizing your filtration system's performance. Its robust design ensures a steady flow of purified water, prolonging system life. Reliable and efficient, it delivers clean, safe drinking water consistently.

Puroaqua - 100 GPD

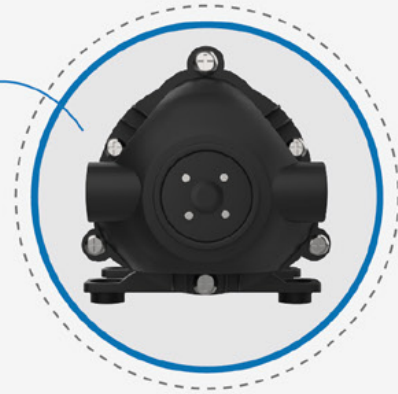

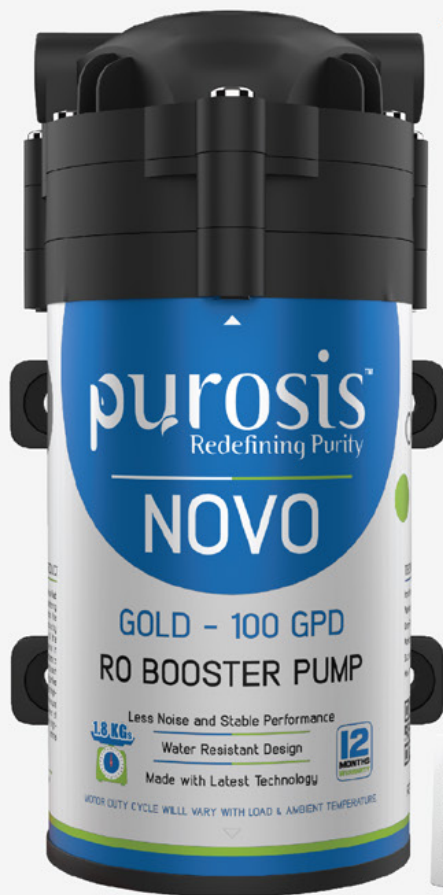

TECHNICAL PARAMETERS			
VOLTAGE	:24 VDC	WORKING PRESSURE	:70 PSI
AMPS	:1.2 A	WORKING FLOW	:1300 ml/min
IN PRESSURE	:20 PSI	OPEN FLOW	:1600 ml/min

BOOSTER PUMP

Stronger flow for cleaner water

An RO booster pump enhances water pressure, ensuring your reverse osmosis system operates at peak efficiency with a steady flow of clean water. It resolves low-pressure issues, reduces system strain, and extends the lifespan of your RO unit. Efficient and cost-effective, it provides reliable purification.

Novo Gold 100 GPD

WHY GO FOR PUROSIS ALKALINE RO WATER PURIFIER?

- ☑ A gift for better health.
- ☑ Suitable for bigger families.
- ☑ Enhances the taste of drinking water and cooked dishes.
- ☑ Very useful at times of no electricity.
- ☑ It is more cost effective and environmentally friendly than packaged drinking water.
- ☑ For Water Upto 2,500 TDS Level.
- ☑ Suitable for Multiple Water Sources.

WATER PURIFIER IS A NECESSITY, NOT AN OPTION

Compact & sleek design with the safest water storage tank which comes in silver & black colour. Wall-mountable & table top RO purifier that enhances the pH level of the purified water up to 9.5 pH for healthy living.

MULTI-STAGE FILTRATION PROCESS

PURIFIER WITH NECESSARY & ESSENTIAL PURIFICATION PROCESS

It uses multiple purification processes to make water 100% pure by removing over 0.0001 μ * size impurities, such as heavy metallic substances, ionized substances and micro organisms. It also dissolved impurities, like bacteria, viruses, heavy metals, pesticides, etc. which can cause water-borne diseases. RO effectively removes those impurities and provides the purest form of water.

Virus
